## Product Specification

|                        |                                                                                    |
|------------------------|------------------------------------------------------------------------------------|
| 产品名称<br>Product Name   | Mouse anti-SARS-CoV-2 coronavirus spike protein (S protein)<br>monoclonal antibody |
| 货号<br>Catalog Number   | CSB-DA702ImN③                                                                      |
| 产品形态<br>Formation      | Liquid                                                                             |
| 保存缓冲<br>Storage buffer | 10mM PBS, 15mM NaN <sub>3</sub> , pH 7.4                                           |
| 宿主<br>Host             | Mouse                                                                              |
| 亚型<br>Isotype          | IgG1                                                                               |
| 存储条件<br>Storage        | Aliquot and store at -20℃ Avoid vigorous shaking.                                  |
| 有效期<br>Valid Period    | -20 °C for two years                                                               |
| 相对纯度<br>Purity         | 90%±5% by SDS-PAGE                                                                 |
| 运用<br>Application      | ELISA, LFIA, CLIA and other possible application                                   |
